

CELLULAR FOAMS

Everad® TAC 4761.0

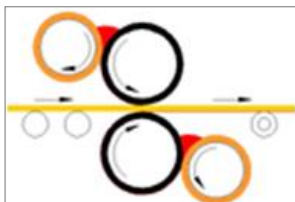

Greater productivity

Safeguarding productivity

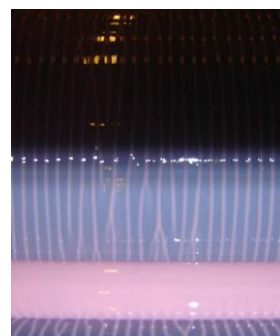

High-volume production of flat laminated sheets requires the use of a roll coater.

Everad® TAC 4761.0

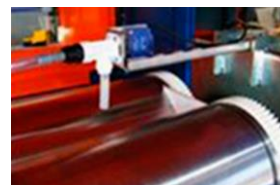

This 1C contact adhesive is eminently suitable for roll coating. It is specially formulated to ensure perfect stability of the adhesive on the rolls and to optimize workflows for operators. The roll coaters are equipped with two pairs of rolls for two-face application.

Rollflex

Benefits of this process :

- Optimally set-up for flat surfaces and tight tolerances
- Single side bonding
- Consistent application rates
- Greater productivity through a safer process
- Fast bonding
- Different sheet sizes are easy to process
- Low maintenance
- Easy to clean after the bonding process

Benefits of Everad® TAC 4761.0 :

- 100% solvent-free
- 1 Component
- LGA certification
- Bonding of foam to foam, wood, fabric or other surfaces
- Fast drying and setting
- High ultimate strength
- High productivity
- Fast process
- One-face bonding
- Repositionable
- Flexible joints
- All kinds of applications
