Everad[®] HAP 3375

Peace of mind for you and your customers !

Striving for efficiency

Mattress manufacturers increasingly use a variety of different materials to make their products more comfortable and more efficient. To that end, they frequently use hotmelt technology. Everad[®] has developed a new product that is suited to the manufacturing of all types of mattress. It is the ideal solution for appreciating the high performance of a versatile and effective hot-melt adhesive that also addresses all workers' job safety needs and environmental requirements.

Everad[®] HAP 3375

Everad[®] HAP 3375 is hotmelt adhesive that is perfectly suitable for gluing in mattress production. It allows gluing with very high initial setting, and yet allows repositioning. The adhesive has been developed for adaptation to manual and automatic processes. Its relatively short open time makes it a high performance product that guarantees the speed and quality of manufacturing.

Everad[®] HAP 3375 will provide the following additional benefits :

- 100% solid content
- 100% solvent free, no VOCs
- Single side application
- Suitable for gluing foam, viscous-elastic foam, latex, non-woven materials etc. to each other or to other materials
- Simple application
- Manual or automatic process
- Viscosity suitable for application by beads or spray
- Repositioning possible
- Very high initial setting
- High final bond
- Suited to gluing with tensions
- High efficiency
- Fast process
- Soft join
- Reduced residual tack to avoid unpleasant noises
- Versatile gluing
- White adhesive, not visible under light or fine fabric
- Pack free packaging for simple, fast and direct use in melting machines

Everad[®] HAP 3375 is suitable for all types of mattress (with or without tensions)

Everad[®] HAP 3375 hotmelt adhesive protects mattresses from unpleasant noise

Everad[®] HAP 3375 is not colored, and glues as unobtrusively as possible
