

CELLULAR FOAMS

Everad® TAC Easy Flow

Make it simple !

Safeguarding productivity

Productivity, cost and process optimization are key concerns for industrial companies. The same is for the application of adhesive.

Make it simple !

The gluing of foam often calls for Everad® TAC 2K two component water-based contact adhesive technology. For maximum ease of use, Everad® has developed a simple, practical and effective spraying unit for this technology. This is the this generation after Everad® Auto Flow 1 and Auto Flow 2.

It is the ideal solution for appreciating the high performance of Everad® TAC 2K two component adhesive and addressing all workers' job safety needs and environmental requirements.

Everad® TAC Easy Flow

The Everad® TAC Easy Flow system for applying adhesive includes:

- 1 45 lt stainless steel under pressure pot
- 1 kit to connect container to the under pressure pot
- 1 electrical cabinet (hanging support in option)

The new Everad® TAC Easy Flow : no contact of the operators with the glue:

- Safer for the operators
- Easy to use
- Easy and fast cleaning

This system offers the following benefits:

Economic:

- Process enables to work in quasi-continuously way with a great autonomy
- Possible supply of glue on long distances or with 2 far stations
- Increased productivity
- Possibility to connect several spray guns

Easy to use:

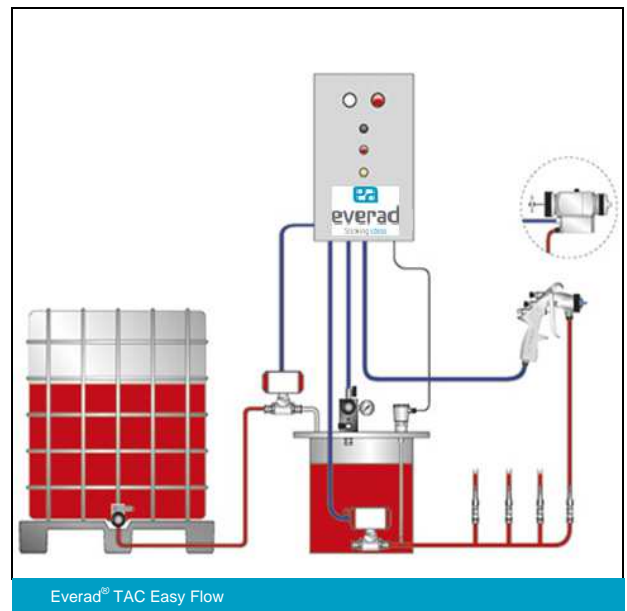

- Clean in running
- No contact of the operators with the glue
- Gain in time
- Working space optimization
- Easy cleaning of the system with Everad® TAC Washer.

Reliable:

- Technical conception
- Solid equipment
- Robust and resistant

Environmental friendly :

- Less packaging to eliminate

Everad® TAC Easy Flow
