

CELLULAR FOAMS

Everad[®] TAC Easy SP1-B25-2K Glue spraying unit Everad[®] TAC 2K

Simple, practical and effective

The gluing of foam often calls for Everad[®] TAC 2K two component water-based contact adhesive technology. For maximum ease of use, Everad[®] has developed a simple, practical and effective spraying unit for this technology. It is the ideal solution for appreciating the high performance of Everad[®] TAC 2K two component adhesive and addressing all workers' job safety needs and environmental requirements.

Everad[®] TAC Easy SP1-B25-2K

The unit is made up of:

- Two under pressure tanks: a 19 liter tank for the adhesive and a 9 liter tank for the activator
- Pre-equipment for two component spraying guns
- An easy-to-move mobile trolley on wheels
- Connecting hoses for adhesive and activator, with fittings and protective sleeve
- Air pressure and adhesive and activator regulators
- 1 or 2 two component guns

This process will offer you the following benefits :

- Easy and fast installation and application
- Easy filling of pressurised tanks
- Two circuits that are fully separate, avoiding the risk of accidental mixing
- Parts in contact with components made of stainless steel or PVC
- Accurate and easily adjustable regulator gauges and filters
- Low investment
- Easy maintenance
